

TODO APP

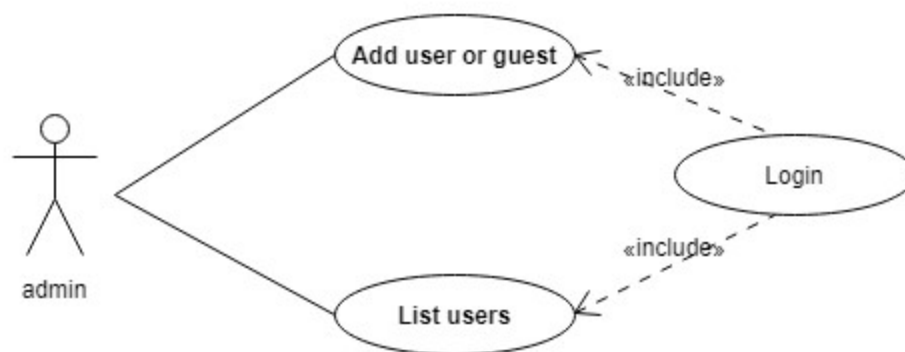

Use Cases

1. Login

Use Case 1	Login
Actor	user/guest/admin
Basic Flow	A user enters to the app introducing user and password, depends on the role it redirects to list of users or list of TODOs. This action only occurs when the user/admin/guest is previously registered.

1. Role Admin

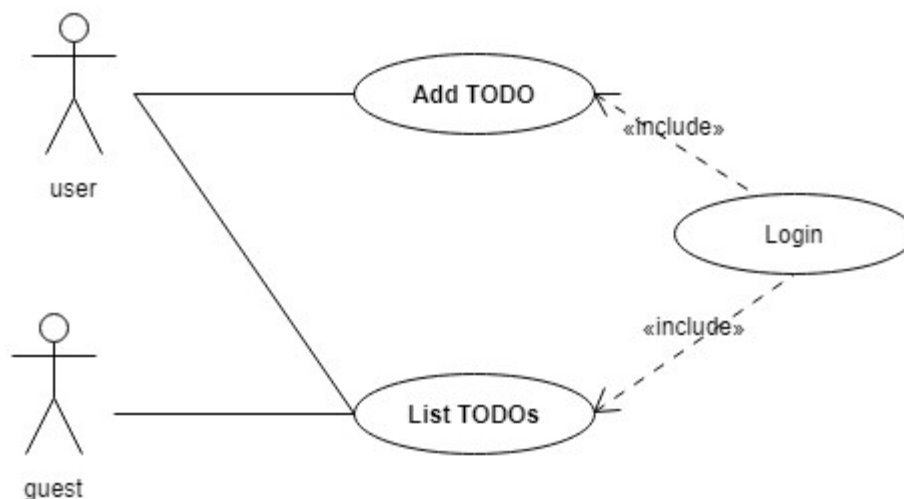

Use Case 2	Add user/guest
-------------------	----------------

Actor	admin
Basic Flow	The admin is the unique user that can register another user, this could happen after the admin is logged in.

Use Case 3	List users
Actor	admin
Basic Flow	After the addition of the new user it shows the new user added.

1. Role User/guest

Use Case 4	Add TODO
Actor	user
Basic Flow	When user is in the app, the user can add new TODO item only if the user has the role user.

Use Case 5	List TODOs
Actor	user / guest
Basic Flow	When List TODOs is selected by the user/guest it shows the list of TODOs.
